5. Biometrics And Transgenics

Rev 13:16-17

And he causeth all, both small and great, rich and poor, free and bond, to receive **a mark in** their right hand, or in their foreheads:

And that no man **might buy or sell**, save he that had the mark, or the name of the beast, or the number of his name.

Rev 14:9-10

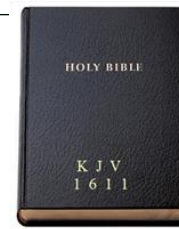

And the third angel followed them, saying with a loud voice, If any man worship the beast and his image, and **receive his mark** in his forehead, or in his hand,

The same shall drink of the wine of the wrath of God, which is poured out without mixture into the cup of his indignation; and he **shall be tormented with fire and brimstone** in the presence of the holy angels, and in the presence of the Lamb:

Dan 2:43

And whereas thou sawest iron mixed with miry clay, **they shall mingle themselves with the seed of men**: but they shall not cleave one to another, even as iron is not mixed with clay.

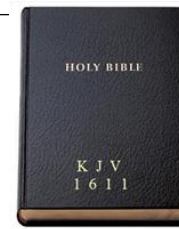

Technological Conditions Of The Last Days

- *Biometrics* is the science and technology that measures and analyzes human body characteristics for authentication purposes
- *Transgenics* is the study and practice of introducing foreign genetic material into an organism's DNA
- MARK= Gr. *charagma*= “a scratch or etching; a stamp (as a badge of servitude)”; the same word is translated GRAVEN (Acts 17:29)
- The word was used to describe the mark branded upon livestock to denote ownership
- The OT equivalent is the Hebrew word *qaaqa* (Lev 19:28) which means, “an incision; imprint; a tattoo; mark”
- It is clear that the Biblical word “mark” implies something VISIBLE and something that draws BLOOD in the process of receiving- while the mark of the Beast may involve an IMPLANT, it is more of an IMPRINT
- The contemporary tattoo and body piercing crazes are preparing the world for the mark of the Beast
- Tattooing and body piercing are forms of BODY modification; the mark of the Beast will entail GENETIC modification

Technological Conditions Of The Last Days

Alt. Pleasant
Bible Institute

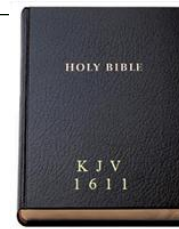

- The mark of the Beast will be an advanced technology combining biometrics and transgenics with a delivery procedure that seems to involve a form of blood-letting (i.e.- a scratch; an incision)
 - It is received IN the body (the forehead or right hand) and required for conducting commerce, yet it is VISIBLE
 - Those who receive it are changed in a way that they are no longer candidates for salvation
 - Since ALL MEN (i.e.- human beings) are candidates for salvation, the implication is that their DNA is changed so they are no longer fully human but genetic hybrids

1 Tim 2:4; 4:10

Who will have **all men** to be saved, and to come unto the knowledge of the truth.

For therefore we both labour and suffer reproach, because we trust in the living God, who is the Saviour of **all men**, specially of those that believe.

- It may be advertised as the way to immortality and godhood in fulfillment of the ancient lie of the serpent: **“ye shall not surely die...and ye shall be as gods”** (Gen 3:4-5)

Technological Conditions Of The Last Days

- Practical and technological prototypes to the mark of the Beast
 - The Roman Catholic Ash Wednesday cross
 - The Hindu bindi/tilak (“dot; mark”)
 - The UPC bar code and scanner
 - RFID (Radio Frequency Identification) implants (e.g.- Verichip)
 - Skin mounted electronics
- There are reports that embedded in the Affordable Care Act (i.e.- “ObamaCare”) is a mandate for all U.S. citizens to be implanted with an RFID microchip by March 23, 2013, but this is subject to interpretation

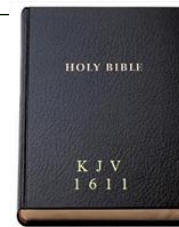

US HEALTHCARE BILL

Subtitle C-11 Sec. 2521

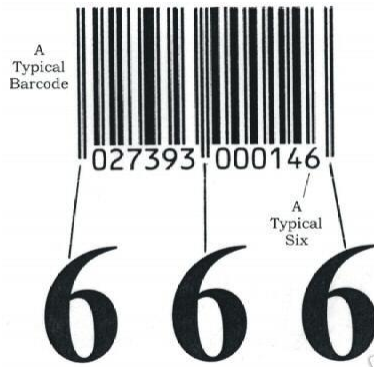

National Medical Device Registry

“The Secretary shall establish a national medical device registry (in this subsection referred to as the ‘registry’) to facilitate analysis of postmarket safety and outcomes data on each device that—“(A) is or has been used in or on a patient; and “(B) is a class III device; or “(ii) a class II device that is implantable.”

Smart skin: Electronics that stick and stretch like a temporary tattoo

An ultrathin, electronic patch with the mechanics of skin, applied to the wrist for EMG and other measurements.

The patches are initially mounted on a thin sheet of water-soluble plastic, then laminated to the skin with water – just like applying a temporary tattoo. Alternately, the electronic components can be applied directly to a temporary tattoo itself, providing concealment for the electronics.

“The blurring of electronics and biology is really the key point here,” Huang said. “All established forms of electronics are hard, rigid. Biology is soft, elastic. It’s two different worlds. This is a way to truly integrate them.”
